54-07-01-01. Statement of intent. The 1991 legislative assembly enacted legislation declaring that it is the policy of this state to regulate through the board of nursing the practice of nursing, those engaged in licensed nursing practice, and those persons who assist in the practice of nursing. Other governmental agencies, through implementation of federal standards and regulations, may also be charged with the regulation of those who assist in the practice of nursing. It is the intent of the board to recognize other state registries that may exist, rather than duplicating those services. These rules govern the provision, administration, and management of nursing interventions by licensed nurses and nursing interventions delegated to unlicensed assistive persons. Licensed nurses are accountable and responsible to clients for the nature and quality of nursing interventions. In organizations where direct nursing care is not provided as a specific service, the provisions of this article do not apply.
